QUALITY

Black Market Pipeline: Vehicles, Riku Honda

BLACK MARKET PIPELINE

COST: 10 KARMA

During character creation, the player chooses one existing individual contact and a single category of merchandise (e.g., vehicles, weapons, electronics, armor, etc.). The selected contact can always buy or sell goods in that category through the black market with better-than-normal rates for the character. Purchases through this contact get a ten percent price reduction and a +2 dice pool modifier for the Availability Test. When looking to sell goods through the contact, the character gets (7 percent x Loyalty) of the item's original value instead of the standard 5 percent. The contact has to be appropriate to the category chosen, though creativity can be king here.

Dealer Connection: Aircraft

DEALER CONNECTION

COST: 3 KARMA

At some point in your wide travels and extra-legal activities, you met someone who has access to retail vehicles, and your connection means that you get vehicles at a discount. When selecting this quality, pick a class of vehicle (ground craft, watercraft, aircraft, or drones). Each time you purchase a vehicle of that class, you receive ten percent off the price. The discount is taken after the gamemaster makes adjustment to the price based on Availability. This quality may be taken up to four times, once for each class of vehicle.

Disheveled CA 152

**DISHEVELED** 

Cost: -5 Karma "You clean up real well!" You've never heard this in your life. Somehow, you have a talent for turning high fashion into a parody. Your posture is poor, nothing fits right, your hair is always a mess, and cologne just smells weird on you. The best you can hope for is for high fashion to come off as business casual. The rest of the time? You are a slob. You never receive positive Social dice pool or limit modifiers from the clothing you wear.

Electronic Witness

DT 48

**ELECTRONIC WITNESS** 

BONUS: 5 KARMA

The character is part of a movement of people who constantly record everything around them. Always. All the time. The idea is that something interesting may eventually happen. Maybe it's not something you'd immediately notice as interesting, but if you archive it, maybe you'll spot something useful later. And you believe that, if everyone did the same as you, the world would be a much better place. And hey, you can sell your recordings too, so that's always good.

With this quality, the character must acquire gear to record video and sound and wear it at all time (cybereyes and cyberears would be perfect, but sensors can otherwise be mounted in gear). This gear must always be on. The character will never turn off wireless functionality on their gear. If the character takes the Day Job quality, then they meet the conditions of the job simply by being, as they then sell the recordings to specialized data brokers and make their money this way. If they opt not to take Day Job, then the character can do what they wish with the recordings.

In any situation where the character cannot record or turns off wifi on his gear, then they feel especially agitated, suffering a –1 dice pool penalty to all actions.

Illness BB 12

**ILLNESS** 

Bonus: 5, 10, or 15 BP or 5, 10, or 15 Karma A character with the Illness quality has a chronic medical condition that requires ongoing treatment to prevent complications and possibly annoying effects. Depending on the level of the quality, the character must periodically succeed in Body + Body (3) Test or their Illness will flair, causing negative dice pool modifiers affecting all tests. If the character keeps up with the necessary medical treatments (pills, injections, inhalers, potions, procedures, etc.; the gamemaster can develop a specific regimen based in the illness), the threshold for this test is reduced by 1.

The Illness Quality Table shows the build point/Karma bonus, dice pool modifier and frequency of tests for each level, as well as the cost for ongoing medical treatment. At the gamemaster's discretion, the Illness quality can be removed permanently through a combination of surgery and genetic therapy at a cost equal to 12 times the monthly treatment cost.

Illness: Chronic Pain

Paraplegic RF 157

**PARAPLEGIC** BONUS: 10 KARMA

Characters with this quality are paralyzed from the waist down. They can perform any physical tasks that do not require the use of their legs, and locomotion usually occurs via wheelchair or wheelchair drone. The character is fast, with a walking speed of Agility x 3 and running speed of Agility x 4, regardless of metatype (shadowrunners get the fast and agile wheelchairs of marathoners and murderball athletes, not slow and cumbersome chairs). They have trouble, though, with stairs and curbs, which can prevent them from getting where they need to go.

The paralysis can be permanent or a temporary condition while the character builds up funds to get surgery to fix the cause. Once the repair is done, the quality has to be bought off. The character has a lot of additional expenses to make the world more manageable. To reflect this, their Lifestyle cost is increased by 10 percent (cumulative with racial modifiers) and vehicles need to be modified, increasing their price by 5 percent, or have a Rigger Interface (p. 461, SR5) for DNI control.

The quality does not affect the character's abilities in astral space or the Matrix.

SINner (National): ROQ

SR5 84

Steely Eyed Wheelman

RF 150

STEELY EYED WHEELMAN

COST: 2 KARMA

No turn too tight. When making Vehicle tests, Terrain Modifiers are reduced by 1 to

a minimum of 0.

Subtle Pilot: Aircraft R5 33

IMPLANT ESSENCE GRADE

Control Rig 1 1.25 Used SR5 452

Control rig: This implant harnesses the raw data-co- ordinating and synchronization power of the middle brain for the express purpose of directly manipulating rigged vehicles and drones (and other devices with rig- ger interface, like turrets). It has a built-in sim module, so you can use it for DNI with other devices. It also comes with a universal data connector and about a meter of retractable cable (it's like getting a free datajack). When you're jumped into a vehicle or drone, the control rig provides its Rating as a dice pool bonus on all Vehicle skill tests. Additionally, the rating of your control rig is added to the Handling and Speed of any vehicle you are jumped into. As if that was not enough, your Vehicle Test thresholds are reduced by the rating of your control rig (to a minimum of 1), again when you're jumped in.

Datajack with Universal Connector Cord 1; ; Sim Module, Hot

Control Rig Booster 1 0.00 None CF 147

#### CONTROL RIG BOOSTER

This specialized breed of neural amplifier nanites are designed to complement implanted control rigs (p. 452, SR5). The nanites organize themselves into artificial neural pathways, building and maintaining a network of nanofilaments. This extends the normal interface between the control rig and the middle brain to parts of the dorsolateral prefrontal cortex, cerebellum, and thalamus—areas of the brain that manage subconscious movement, sensory interpretation, and instinctive decision-making. The booster colony's dedicated neural pathways allow a rigger to make greater use of the brain's intuitive understanding of spatial positioning and capacity for instinctive motion control when jumped in to a vehicle or drone. The control rig itself translates the resulting neural impulses into rigging data like speed control, inertia handling, and so forth.

The booster applies its Rating as a dice pool modifier to your Vehicle Tests when you're jumped into a drone or vehicle. It cannot be combined with the control rig optimization genetech.

Cyberears 1 0.25 Used SR5 453

Cyberears: Ordinarily, cyberears replace only the inner ear, although the whole thing can be replaced as well if you like. Cyberears offer hearing with normal ranges (like an omni-directional microphone), a sound link, and Capacity for modifications and enhancements.

Antennae, Antennae, Antennae, Sound Link;

 CF 159

#### NARCO

This is a set of several minor genetic modifications that have the collective effect of modifying the way your body processes drugs. These genes were discovered through study of survivors of years of heavy substance abuse. While you become more likely to become addicted to drugs, you experience greater effects of drugs and lessened effects when they wear off. Any drug that grants a positive attribute modifier as an effect increases that modifier by +1. Any drug that deals damage when it wears off deals two less damage, and any negative effects that occur when a drug wears off

Voice Modulator 1 0.25 Used SR5 452

Voice Modulator: This implant gives you perfect pitch and enormous vocal flexibility and distortion ca- pabilities. You can speak with an increased volume (up to 100 decibels) without strain, shift your pitch to make perfect bird calls or mellifluous singing, and most importantly, uncanny vocal impressions. The modulator can also play back (and more or less perfectly imitate) a recorded or captured voice. Add the Rating of the mod- ulator to your dice pool for Impersonation skill tests.

ARMOR VALUE

Equipped

Armor Jacket 12 SR5 437

Armor jacket: The most popular armor solution on the streets comes in all styles imaginable. It offers good protection without catching too much attention. But don't think of wearing one to a dinner party.

Ballistic Mask +2 RG 74

## BALLISTIC MASK

By far my best seller, especially the basic model. They come in a variety of custom moldings and paint jobs to get almost any look imaginable, but matte black classic sells the best. They have limits when they're basic models to keep them functional, but once electronic vision systems are added, the possibilities are endless.

Ballistic masks can take vision enhancements as well as any modification a helmet can take.

Custom jobs are, naturally, more expensive.

Certified Credstick, Silver	-	2	SR5 442
Certified Credstick, Standard	-	4	SR5 442
Essy Motors DroneMaster	-	1	SR5 266

Bug scanner: Also called a radio signal scanner, this device locates and locks in wireless devices within 20 meters. The scanner can also measure a signal's strength and pinpoint its location. To operate a bug scanner, roll Electronic Warfare + Logic [Rating]. A device that is run- ning silent (like a Stealth tag) can use its Logic + Sleaze to defend against the scan. If you get any net hits at all, you find the device.

Jammer, Area	4	1	SR5 441
Micro-Transceiver	-	1	SR5 441

Micro-transceiver: This classic short-range com- municator has been favored by professional operatives since the 2050s. It doesn't do anything special, it just lets you communicate by voice with other micro-trans- ceivers and commlinks that you (and the other person) choose, within a kilometer. The micro-transceiver con- sists of an ear bud and an adhesive subvocal micro- phone (p. 439), both of which are commonly available in hard-to-spot designs.

Miniwelder	-	1	SR5
			448

Miniwelder: This portable device creates a small electric arc to melt metals, either to cut through met- al or to weld it together. Its power supply allows it to operate for 30 minutes. While creating an intense heat, the arc is much too small to make a good weapon (it would be like trying to stab someone with a lighter). The miniwelder has a Damage Value of 25 when used to cut through barriers.

Miniwelder Fuel Canister	-	1	SR5 448
White Noise Generator	6	1	SR5 441

White noise generator: This device creates a field of random noise, masking the sounds within its area and preventing direct audio surveillance. All Perception Tests to overhear a conversation within (Rating) meters of a white noise generator receive a negative dice pool modifier equal to the generator's Rating. If more than one generator is in use, only count the highest rating. A white noise generator is redundant in a noisy environ- ment (such as a nightclub or a firefight) and does not help to curtail video surveillance or jam wireless signals.

CONTACT LOCATION ARCHETYPE CONNECTION LOYALTY
Riku Honda McChord AFB, Fort Lewis Vehicle Dealer (Air) 5 2

Metatype: Ork Gender: Male

Age: Middle-Aged Preferred Cash (Credstick)

Payment Method:

Hobbies/Vice: Vehicles (Sports Cars)

Personal Life: Divorced

Honda acts like your typical care salesman, with a few... Upgrades. He's never far from his "dapper" hat, wears an ill-fitting but barely presentable three piece suit, and coats his tusks with gaudy gold flake every morning. That's because his clientele are a little... Richer than most used car lots. Most riggers only know him for his aircraft, usually military surplus and the like, but if you get on the Italian-Japa-American Ork's shoulder, he has the connections to get anything you could need, from yachts to drones. Just don't ask why some of them are so much cheaper than market rate. Or why he talks with a New York accent.

Chips: 1

Tláloc Redmond Barrens Fixer 5 2

Metatype: Human Gender: Unknown Age: Unknown

Preferred Service (Shadowrunner Job)

Payment Method:

Personal Life: Unknown

Tláloc keeps their cards close to their chest, communicating over heavily obfuscated means whenever possible, and practically never in person. When they do, their identity is equally shrouded through more practical means. Rumor is, they're on the board of Aztech, but there's no real way to know.

#### Notes

 $\label{lem:https://docs.google.com/spreadsheets/d/1uecOFoFvxJp2DcfVUS23J7ezNvPMRQg07OjA4Lw5-Hs/edit?usp=sharing. Planning the state of the state o$ 

Vehicle Test = Anything when jumped in? Does not include defense Vehicle skill test = More cut and dry skill tests, therefore not defense

Combat test = Includes vehicles?

Defense test = Includes when jumped in?

Control Rig: +Rating dice to Vehicle skill tests and limits (sensor, speed, handling, and accuracy), hubrule doesn't actually "affect" base stats

Control Rig Nanomachines Son: +Rating dice to Vehicle tests

Hot Sim: +3d6 Matrix init, +1 dice to Vehicle Actions

Bioware:

Narco: Nothing on its own but boosts drugs by +1 (+1 Rea, +1 Int) Y16420, 12F

Reakt: +2 dice pool modifier to all ranged and melee Defense tests (this includes dodging indirect combat spells) Y73000, 10

Synch: +1 dice pool modifier on combat tests 14000, 8

Synaptic Booster: +1 Reaction Y95000, 6R

Cerebellum Booster: +1-2 Intuition Y50000 x rating, 8 x rating

**Genetic Optimization** 

**Exceptional Attribute?** 

SURGE - Metagenetic Improvement?

Important Stats:

REA: Vehicle Tests, vehicle defense, vehicle stealth

INT: Vehicle defense, sensor tests, infiltration when jumped in, defend marks LOG: Repair matrix damage, compensate for noise on the fly, attacking when jumped in WIL: Resist biofeedback, full matrix defense, defend/remove marks (once you get cyberdeck)

Important skills:

Pilot (type): Piloting, defending Ewar: Compensate for noise on the fly

Gunnery: Shooting when jumped in to non-anthrodrones

Autosofts (dogbrains):

(Model) Evasion: Defense, stealth

(Model) Pilot: Initiative, perception, attacking

Clearsight: Perception

(Weapon) Targeting: Hmm I wonder

Noise Cheat Sheet: Silence is Golden: -2 noise Cyberears: -3 noise Fresnel Fabric: Post gen.

Satellite uplink: Max 5 noise from distance

Retrans unit: Back ass wards but takes the larger of the distance malus

Marks (decker shit)

Brute Force: Cybercombat + Logic vs. Firewall + Willpower to add mark Erase Mark: Cybercombat + Logic vs. Firewall + Willpower to remove mark Hack on the Fly: Hacking + Logic vs. Firewall + Intuition to add mark

Trace Icon: Computer + Intuition vs. Sleaze + Willpower

#### Concept

Utility rigger who always has the right tool for the situation. Dabbles in decking in order to cover their Matrix ass.

Named after the only Quebecois Ace not KIA:

### Description

Jack of all trades drone rigger, who is trying to keep her nose clean in a futile attempt to cling to her long-gone old life. Is also a shadowrun VTuber.

## Background

Jeanne was born and raised a blue-blooded *Québécoise* with a silver spoon in her mouth. Particularly, the silver spoon of MCT, where her parents were employed in the Beaux Retail Consortium. She made her way up the ranks, getting a start in fashion design and coasting through life, pursuing hobbies like drone racing and studying for a pilot's license, and landing a cushy position doing not much for very little pay. Still, looking over Montréal she knew full well that silver spoon, though probably made of plastic, was still making strides for her.

It all came tumbling down when a group of Pink Mohawks failed an extraction. They were brash, loud, and unafraid of the consequences of gunning down civilians in broad daylight. She had started her day normally, but ended it barely alive in the back of a DocWagon, three bullets in her back and penning a brand new Basic contract.

Her life changed that day, and not just because the DocWagon salesperson was behind on his commission. Though she had the Nuyen to cover medical costs, defying logic, she didn't bother getting her spine repaired, instead choosing to play the victim. Chronic, phantom pains began flaring up, and for a while she would wake up to the nonexistent sounds of automatic weapons fire in a cold sweat. Her appearance grew disheveled, and her work performance dropped. Eventually, she quit.

In the deepest part of her mind, she knew her money wouldn't last forever, but she wallowed in her sorrows nonetheless. First, it was the quality beers and wines of Quebec. Then BTLs. Then hard drugs. Then, a strange turn: Thrills.

She had already taken to having an armed drone follow her around as she made her illicit acquisitions, and her dealer let her in on a proposition. He knew some guys who needed a hand to hold a gun--anyone would do--and she fit the bill as a nobody that nobody would miss. He dangled the bait of some "pocket change" in front of this washed up wageslave and she bit.

Her first job went well, not a single shot fired, and frankly she wasn't worth kidnapping. Not that she knew the risks, at the time, but she worked with the dealer as an impromptu fixer, and he found her more work. The moment bullets began to fly, though, she realized that she wasn't particularly cut out for killing people.

She did a bit more work, but never beyond the point of minor gang crime. Still, she heard tales from the shadows of a far more lucrative business. Lured by these thrills, and under the false impression she could quit at any time, she decided to travel far away from her home country. The Tir, Azltan, and NAN didn't particularly appeal for various reasons, and the CAS and UCAS were too close to home. Eventually, she settled on the Free City of Seattle, and, though worried her limited English skill could cause problems, packed her bags.

This business was, of course, internet entertainment. Her isolation lead to her utilizing her charisma in an odd way, commentating over her jobs and even daily life, and when she remade her Persona after moving to Seattle she decided to start recording this commentary. She certainly made her way into the shadows, expanding her repretoire beyond petty crimes, but at the same time, piloting her drones started feeling more and more like a game. She became obsessed with content creation, constantly recording footage with her live matrix commentary, and editing it for upload to wherever people could watch.
