COST: 4 KARMA

Nothing impresses an out-of-town Johnson more than negotiating in their native tongue. And knowing when they're telling their goon squad to kill you is pretty useful too. This quality represents a natural gift for learning and understanding languages. Characters with this quality halve the learning time for a language, and the quality also provides a +1 dice pool modifier to all Language skill tests the character makes. If this quality is purchased at character creation, the player purchases Language skill points at a 2-for-1 rate. After character creation, language skill ranks of 3 or higher receive a 1 Karma cost reduction for each rank.

SR5 69 Magician

This is a set of several minor genetic modifications that have the collective effect of modifying the way your body processes drugs. These genes were discovered through study of survivors of years of heavy substance abuse. While you become more likely to become addicted to drugs, you experience greater effects of drugs and lessened effects when they wear off. Any drug that grants a positive attribute modifier as an effect increases that modifier by +1. Any drug that deals damage when it wears off deals two less damage, and any negative effects that occur when a drug wears off

ZOÉ

The Zoé/Armanté fashion shadow war was a major victory for Armanté in terms of getting the line back in house (though now under the yoke of Aztechnology), but Zoé made quite a stir with some of the things their R&D division popped out in an effort to protect key execs from Armanté retaliation.

> That particular war isn't over, and Zoé has found some megacorporate backing of their own. Both Horizon and Lone Star executives have been seen wearing Zoé in the boardrooms and back offices far more than they had in the past.

About the size of an old-fashioned quarter, or about 2.5 centimeters in diameter for those unfamiliar with ancient UCAS coins, the trode patch allows the same level of DNI interface as a full rig, but rather than needing a full net or headband of them, it's a single small piece. It requires direct skin contact near the brain, so a small patch of bare skin on the cranium is needed, but that's better than a hole in the head any day. Many models even come with a custom exterior that can match your hair, or you can get one with any number of logos or designs. Comms Minimal hassle. John Fortnite Tilted Towers Fixer 5 1

John Fortnite is the spitting image of the late simsense actor, Keanu "V" Reeves III. He can be found shilling "V bucks" on the street, his own made up currency, or asking for credstick codes to support him achieving "number one victory royale," whatever that means. But don't mess with V: If he wants your body, he'll fuck it.

Concept

Wuxing mage hunter-killer. Provides magic support and geeks the mage.

Description

A mage hunter fresh off the boat from Taiwan in search of their quarry. They work with the Triads and Shadow community both to infiltrate, and to raise funds for their goal. After all, Wuxing, like most megas, won't lift a finger against runners unless it's profitable.

Background

Lin Da Fong, 24. Born to mundane parents in a Wuxing arcology in Taipei. Passed selection, and Awakened as a full mage at age 13 as part of the magical education program. Their lacking intelligence made the Wuxing ways difficult, but the instructors were able to twist the Buddhist teachings to fit while still performing indoctrination. Hardly the brightest bulb, they enlisted at 18, preferring hands on training to book learning, though were still able to quickly pick up languages when not getting skills and knowledge literally beat into them. After graduating, they spent two years providing magical security at key sites in the arcology to gain counter-mage experience, and was recently transferred to "internal affairs." Having received their first assignment, they have transferred to handlers in Seattle, the last known location of their mark.
